# LITTLE BLUE PENGUIN

*Eudyptula minor*

## INTRODUCTION:

The Little Blue penguin is the smallest species of penguin in the world and is found exclusively in Australia and New Zealand (see Figure 1). This species is also referred to as little penguin, blue penguin or fairy penguin. All data included in the studbook is current through 01 March 2011. There are 311 historically listed and 55 (29.26.0) living North American Little Blue penguins in the studbook.

## TAXONOMY/IUCN STATUS:

This species consists of six subspecies, five of which are found in New Zealand. Only *Eudyptula minor novaehollandiae* is found in Australia and all living North American specimens belong to this subspecies.\*

The global population size has not been quantified, but the population in Australia is estimated as under 1,000,000 individuals (del Hoyo et al. 1992).

SUB-SPECIES	IUCN CATEGORY
<i>Eudyptula minor novaehollandiae</i> *	Least Concern
<i>Eudyptula minor iredalei</i>	Least Concern
<i>Eudyptula minor variabilis</i>	Least Concern
<i>Eudyptula minor minor</i>	Least Concern
<i>Eudyptula minor chathamensis</i>	Least Concern
<i>Eudyptula minor albosignata</i> (White-Flipped penguin)	Endangered

Figure 1: Little blue penguin breeding locations. (Map adapted from Williams, 1995)

## WILD POPULATIONS:

Little Blue penguins are considered a resident species as they remain in the area of their colonies throughout the year. The Little Blue penguin breeds around the entire perimeter of New Zealand, along the coast of Tasmania and along the southern coast of the Australian mainland primarily on off shore islands (see Figure 1).

**PHYSICAL STATISTICS:**

Standing Height: 10 - 12 inches

Length: 16 - 18 inches

Weight: 2 - 3 pounds

Plumage: Varying shades of indigo blue on the back, head and wings with white on the under parts including the undersides of the wings.

Eyes: Grey

**DIET:**

Predominately small fish such as pilchards, anchovy and sprat but occasionally squid. Feeding mainly occurs in inshore waters.

**HABITS:**

Often confused as nocturnal due to their strategy of leaving for sea to forage before dawn and returning from the sea after dark to avoid on shore predators. Most foraging done within 15 feet of the surface with maximum diving depths recorded at 230 feet.

**REPRODUCTION:**

Nest in burrows and lays 2 eggs, which are incubated for 35-38 days by both males and females.

Chicks typically weigh 35-40g at hatch.

Chicks are covered in down and fed regurgitated food from the parents until they are 2 months old.

Sexually mature at about three years of age.

**PREDATORS:**

Natural: Gulls, hawks, fur seals, sea lions, sharks and barracuda.

Introduced: Dogs, cats, weasels, stoats, ferrets, foxes and rats.

**THREATS TO WILD POPULATIONS:**

Predation by introduced animals (see above).

Pollution including plastics, fishing line and oil spills.

Depletion of food stocks from over fishing and pollution.

Human infringement on breeding colonies.

### **CAPTIVE POPULATION:**

The first importations of Little Blue penguins into North America appear to have been in the 1950's and early 1960's by the San Diego Zoo. Most of these penguins died within a year or two of importation. More importations occurred in 1971 by the Detroit Zoo and in 1975 by the Montreal Aquarium/Biodome. San Diego transferred the remainder of their population to the Detroit Zoo in 1986. The Detroit population died out in the 1980's except for one remaining 20+ year old individual. The Biodome exported all of their remaining Little Blue penguins to Japan in 1991 and 1992.

The second wave occurred in 1995 with an importation by Omaha from the Taronga Zoo Australia and in 1996 from Jurong Birdpark in Singapore. This was followed in 1997 and 1999 with importations from the Melbourne Zoo by the New England Aquarium. The Cincinnati Zoo also began to import penguins from the Taronga Zoo in 1999.

Australian Wildlife Protection laws prohibit the exportation of wild caught Little Blue penguins. Captive born offspring from approved non-profit institutions may be available to non-profit importing institutions in North America.

# STUDBOOK FORMAT

The Little Blue Penguin studbook uses the Single Population Animal Record Keeping System (SPARKS) program, version 1.5.

---

**STUD #:** Unique number assigned to individual penguins.

**SEX:** M = male F = female U = unknown

**HATCH DATE:** Estimated hatch date.

**SIRE/DAM:** Studbook numbers for sire and dam; 'Unk' indicates unknown sire or dam.

**LOCATION:** The facility that has acquired the penguin. If a penguin is no longer traceable, 'ltf' (lost to follow up) will appear to the right of the last known location.

**DATE:** The date on which the penguin arrived or left a facility. Day/month/year format. A '~' indicates that the date is approximate. 'Unk' or '????' indicates that the date is unknown.

**LOCAL ID:** ISIS or other institutional ID.

**EVENT:** Capture, hatch, transfer or death.

**TAG/BAND:** Color or number given to visually identify penguins.

**TAXON:** Subspecies for Little penguins.
