

SWAINSON'S TOUCAN

Ramphastus swainsonii

Order: Piciformes Family: Ramphastidae

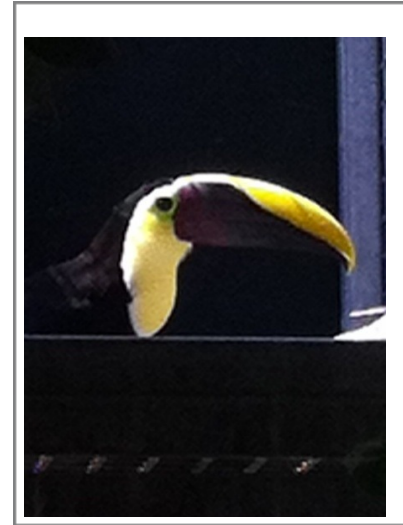

Range: honduras to Colombia

IUCN: Least Concern

USFW ESA: not listed

CITES: Not listed

MBTA: not listed

With a large range the Swainsons toucan is listed as Least Concern by the IUCN. At this time the population has not been quantified. Although not facing any specific threats the pet trade and deforestation are a concern in the future. Due to their beauty and intelligence Swainsons toucans have become popular as pets.
