Supported by SeaWorld San Antonio

Data current as of 30 April 2007

Table of Contents

Data Field Descriptions	2.
Geographic and Chronological Scope	2.
Living Population by Institution	3.
Historical Population listed by Studbook number	14.
Location Glossary listed by mnemonic code	52.
AZA Studbook Disclaimer	64.

Data Field Descriptions

Stud # indicates the North American regional Studbook number assigned to that individual.

Sex is indicated by M for Male, F for Female and U for unknown.

Hatch Date indicates the date the individual hatched.

Sire and Dam indicates the parents of the individual with WILD for wild born (not in captivity), UNK for unknown parent or a number that denotes a studbook number for that parent.

Location indicates where that individual has been or is located presently and coincides with a **Date**.

Local ID refers to the identification code given to that individual at the time of accession into the collection.

Event indicates a capture, hatch, death or movement between facilities. LTF was used when a facility had a bird escape or when records could not be found as to the disposition of that individual either at that facility or after transferring.

Tag/Band indicates the band number given to that individual for identification.

Geographic and Chronological Scope

This is the North American Regional Studbook for the Keel-billed Toucan *Ramphastos sulfuratus* held in institutions throughout North America. It is inclusive of the United States, Canada and Mexico with data current as of 30 April 2007 and publication in July 2007.

Restricted to: (*Ramphastos sulfuratus*)

Locations: N.AMERICA

Living as of 30 April 2007
